

REMARKS

In view of paragraphs 1 and 2 of the Action, claim 6 has been canceled.

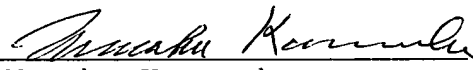

In response to the rejections in paragraphs 4, 5 and 7 of the Action, claim 1 has been amended such that said first and second main beads are arranged to project in directions opposite to each other without contact when the first and second metal base plates are assembled.

In JP '198, the main beads regarded by the Examiner contact each other when the plates are assembled. Also, in Nicholson, the main beads regarded by the Examiner contact each other. Claim 1 now amended is not disclosed or suggested by the cited references.

Two month extension of time is hereby requested. A credit card authorization form in the amount of \$225.00 is attached herewith for the two month extension of time.

Reconsideration and allowance are earnestly solicited.

Respectfully Submitted,

By
